1. Introduction

1.1. Definitions of the abbreviations

ABBREVIATION	EXPLANATION
RTU	Riga Technical University
DBMS	Database Management System
Scoring	Student knowledge evaluation system for the course "Solution Algorithmization and Programming"
XLSX	Microsoft Office Open XML file format
XML	Language XML, extensible markup language

1.2. Document purpose

This document describes the study project student knowledge evaluation system for course "Solution Algorithmization and Programming "(hereinafter" Scoring ") test report.

The document is intended for the parties involved in testing and maintenance of the software developed within the study project:

- lecturers of the customer (RTU), who are responsible for accepting and evaluating the project deliverables,
- technical specialists of the developer, who are responsible for its implementation design and implementation.

1.3. Related Documents

This specification has been developed based on the following documents:

- [1] EXERCISE STUDY DRAFT Subject "Web applications Creating"
- [2] Software Requirements Specification
- [3] Software Design Description

1.4. General requirements for test execution

In order to test the operation of the system user needs:

- Access to the system
- user name and password
- user rights to the teacher's role

2. Functions that need testing

No.	DESCRIPTION	PPS REQUIREMENT
1	User Authorization	SCORING-1
2	User Administration	SCORING-2
3	Test Administration	SCORING-3, SCORING-4, SCORING-6
4	Test Execution	SCORING-7
5	Reporting	SCORING-5

3. Test Scenarios

3.1. User Authorization

Open the authorization form.

3.1.1. Checking if the required fields are filled:

- Enter information in fields
- Press the "Login" button

Expected result: A message is displayed that no mandatory fields have been entered.

Test result: Passed

3.1.2. Checking the user name and password

- Enter the value "test" in the "Username" field
- enter the value "test" in the "Password" field
- Press the "Login" button

Expected result: A message is displayed that an incorrect user name or password has been entered.

Test result: Passed

3.1.3. Successful user authorization

- Enter the correct user name in the "Username" field
- field Enter the correct password in the "Password" field
- Press the "Login" button

Expected result: The user is successfully authorized.

Test result: Passed

3.2. User administration

Authorize with a user who has the role "Teacher". We open the user administration form.

3.2.1. Displaying the user list data

- Press the "Search" button

3.2.2. Filtering the data of the user list

- Enter the value "non-existent" in the "Name" field
- Press the "Search" button

Expected result: An empty list of users is displayed.

Test result: Passed

3.2.3. To edit user data

- In the list, select the user and click on the entry edit icon.
- We change the user name in the "Name" field.
- Click the "Save" button.

Expected result: Returning to the list, we make sure that the user data has been changed.

Test result: Passed

3.2.4. Users import

- Press the button "Import users" ● says XLSX file with the test user data.
- Click the "Register users" button.

Expected result: Returning to the list, we make sure that the users specified in the XLSX file have been successfully imported.

Test result: Passed

3.2.5. Deleting a user

- In the list, select the user and click on the delete entry icon.

Expected result: In the list we make sure that the user has been deleted.

Test result: Passed

3.3. Test administration

Authorize with a user who has the role "Teacher". Open the test administration form.

3.3.1. Displaying test list data

Expected result: A list of all tests is displayed.

Test result: Passed

3.3.2. Entering the required fields for entering a new test

- Click the "Create test" button
- Click the "Add" button

Expected result: Blank input fields are created.

Test result: Passed

3.3.3. Entering a new test

- Click the "Create test" button
- Fill in the "Name" field
- Fills in the "How many questions?" field

- Fill in the field “Max attempts”
- Fill in the field “Time limit (minutes)”
- Fill in the field “Availability”
- Click the “Add” button

Expected result: The test is saved, make sure that the entered test is displayed in the test list.

Test result: Passed

3.3.4. Adding a question
